Daniel Fabiani

FRONTEND DEVELOPER | JAVASCRIPT | REACT.JS

✉ danielfabiani.dev@gmail.com   in Daniel Fabiani   ⌗ DanielFabiani   📞 (+54)11 70378063

I am a professional Frontend Developer in web programming, focused on seeking solutions to digital problems. Specializing in creating user interfaces in applications with modern, attractive, and dynamic designs.

I have strong organizational skills, I'm empathetic and resilient, and I adapt easily. I also have experience working with agile methodologies like SCRUM, using tools like Trello or Jira for development.

EXPERIENCIA

Full Stack Henry Assistant
🏢 Henry Online Academy (Argentina)   📅 Aug. 2023 - Today

My goal is for everyone to have a fantastic experience at Henry and to find a safe space within the community to grow and learn.

- Selecting, coordinating, training, and guiding the team of Teaching Assistants, equipping them with soft skills for effective interaction with students during the bootcamp.

- Providing support and guidance during the SUP session for an enhanced utilization of the academy's space.

Full stack web - Academic Project
🏢 TicketShow   📅 Jul. 2023 - Aug. 2023

Event ticket selling application featuring integrated payment gateway, local and third-party authentication, combined filters, a reviews/rating system, and an administration dashboard.

- Designed and developed the UI, along with creating ReactJs components, and utilizing Tailwind CSS for styling and animations.

- Managed local and global states using Redux for rendering data such as reviews, cards, banners, details, checkout, among others.

Full stack web - Academic Project
🏢 Videogames SPA   📅 Jun. 2023 – Jul. 2023

Full-stack web application dedicated to video games, enabling users to explore and discover information about various games through an intuitive interface.

- I developed the backend using Node.js and Express as the framework, creating a database using PostgreSQL and Sequelize as the ORM.

- The backend provides endpoints for performing CRUD operations on the database. I implemented routes and controllers in Express to handle incoming HTTP requests and connected these routes to specific functions in the controllers.

- For the frontend development, I used React.js for the structure and components, and Redux for managing global states. The UI of the App was crafted using pure CSS, including animations and effects.

Sales Manager
🏢 Master Distribution S.A.   📅 Feb. 2019 – Dec. 2022

- I was responsible for leading and supervising the sales team, setting strategies and goals to achieve sales objectives, and ensuring business growth. Additionally, I managed to maintain strong business relationships with clients, identified new market opportunities, and coordinated promotional activities to drive sales.

SKILLS

Tech

- JavaScript
- TypeScript
- React
- Next.Js
- CSS
- Tailwind
- Bootstrap
- Material UI
- Figma
- Jira

Idiomas

Español - Nativo
English - B2 Upper intermediate
